

AVIATION WEATHER MADE SIMPLE

December 4th, and 6th from 7PM - 9PM, and December 8th from 8AM - 12:00PM.

Aviation Weather Made Simple is conducted in a computer lab. You will learn how to access the government Aviation Weather Site and use it's information for current and forecast weather. The National Weather Service Instructors will help you access a "Standard Briefing" including Airmets, Sigmet, and will demonstrate /explain live Aviation Radar.

14 seats available. If the class fills quickly watch for additional Scheduling dates.

Sponsored by Buddy Thornton, Airspace Manager Fort Sill, Precision Flight, National Weather Service and the FAA Safety Team.

Taught by Marco Bohorquez, Doug Streu, and Bobby Prentice (All Senior Meteorology Instructors from the National Weather Service), and Harry Weatherford, FAA Safety Team Representative.

Exit I-44 at Key Gate, (coming from OKC turn Right after exiting), (coming from Wichita Falls after exiting take curve to the left and go west), go through gate, stay on Sheridan Road Turn right at entrance to movie theater. Truman Education Center is in that parking lot on the south side. Coming from Altus exit at Sheridan Road North (Fort Sill) go through gate. The education Center is adjacent to Walkway bridge over Sheridan Road on the West Side. You can't turn left into parking lot, you must go to the next light and reverse course.

The center has WIFI access to those that have laptops.
